

High Production Coil Fiber Laser With Conveyor Table

LF3015MB

Bed Size: 3000x1500mm (4000x1500, 6000x1500mm)

Fiber Laser Source: MAX, Raycus or IPG

Power: 1.5kW, 3kW, 6kW

FROM

\$199,900_{+GST}

The LF3015MB is our industrial coil cutting machine, the perfect machine for companies producing repetitive products in thin sheet stock. Experience fast production, little to no loading time and cheaper material cost when buying your steel in coil form. With the lowest competitive input cost, this machine will pay for itself in not time. Paired with a compressor for air cutting, you have now bottomed out your input costs!

WHY BOCI?

Easy servicing
Lens monitoring
Gas monitoring
Precision Tracking

Features:

- Fully enclosed main table with CE certified fiber laser safety glass windows
- Coil support including de-coiler/levelling feeder
- Leveling feeder leveling the material, adjustment accuracy of correction amount: ± 0.01 mm
- Coil width from 1000-1300mm
- Automated conveyor table design
- Robotic arm or Gantry style unloader options
- Separate Electronic tower, dust-proof and air conditioned
- 4*Camera monitoring system for internal and loading table monitoring at the front of the machine
- BOCI or Raytools precision automatic focussing laser head
- Ipad style interface
- Yaskawa motor drive
- YVC Rack and gear system
- Moto Reducer gear reducer
- Automatic material tracking (follows the material surface allowing
- Cutting of materials with slight bending or warping
- Cypcut 2000S software, easy to use compatible with most files
- Easy to use laser control system with screen and wireless controller
- O2 and N2 electronic gas regulators – allowing for gas pressure to be controlled via the software program.

System includes a Coil unloader, high tolerance de-coiling unit, with optional gantry or robot style offloading system available. The gantry is recommended for skeleton offloading (where parts are attached with micro-joints) and robot arm programmable for part collection. The gantry lifting system is vacuum as standard with magnetic lifting available for light weight smaller part cutting

Technical Parameters	Specifications
Laser Power	1.5kW, 3kW, 6kW
Bed Size	3000 x 1500mm (also available in 4000x1500, 6000x1500mm)
Coil Width	1000-1300mm
Machines Size	23500 x 5500 x 2650(H)mm
Approximate Working Area	25 x 6.5 x 2.7m
Slide Door Access	3000mm
Laser Source Type	MAX, Raycus or IPG
Laser Head Type	Automatic focussing laser head 1.5kW = Raytools BM111 3kW = BOCI BLT 4 Series 6kW = BOCI BLT 4 Series
Cooling Type	Industrial Water Cooling – S&A water chiller
Moving Speed	120m/min
Acceleration	1.5G
Laser Output Control	0-100% set by software
Drive Method	YYC Rack and pinion system, Moto Reducer gear reducer, with Yaskawa motor drive
Positioning Accuracy	0.02mm
Re-positioning Accuracy	0.02mm
Minimum Line Width	0.1mm
Controlling Software	Cypcut Control System 2000S, including nesting, edge seeking and automatic crash protection
Graphic Format Supported	Graphics files - Ai, DXF, PLT, Gerber, etc. G code – MaterCam, Type3, Wentai etc.
Compatible Software	Illustrator, photoshop, CorelDraw, Autocad, Solidworks, MaterCam, Type3, Wentai etc.
Colour Separation	Yes (imports colours to control cutting layers)
Auxiliary Equipment	Exhaust Fan, Industrial water-cooling unit
Power Supply	Machine: 1.5kW = 415V 50Hz 32amp 3kW = 415V 50Hz 50amp 6kW = 415V 50Hz 63amp
Gas Connection	O2 (mild steel and copper cutting) – 4 pack min Min 99.7% purity – 10m3/h maximum flow rate – 10bar max pressure N2 (Stainless, Aluminium, Brass and thin Mild steel cutting) – 9 pack min Min 99.9% purity – 40m3/h maximum flow rate – 24bar max pressure Compressed air (Stainless, Aluminium, Brass and thin Mild steel cutting) SEE OUR 20DHY-20Bar COMPRESSOR OPTIONS
Working Environment	Temperature:0-45C, Humidity 5-95% (No Condensate Water)

Fiber Power Explained

What Power Do You Really Need for Your Application?

What Do We Recommend For Reliable Production?

800W Laser Source

- Up to 8mm Carbon steel
- Up to 4mm Stainless steel
- Up to 2mm Aluminium
- Up to 2mm Brass/non-ferrous

3kW Laser Source

- Up to 20mm Carbon steel
- Up to 12mm Stainless steel
- Up to 10mm Aluminium
- Up to 7mm Brass/non-ferrous

20kW Laser Source

- Up to 50mm Carbon steel
- Up to 40mm Stainless steel
- Up to 30 mm Aluminium
- Up to 30mm Brass/non-ferrous

1200W Laser Source

- Up to 12mm Carbon steel
- Up to 6mm Stainless steel
- Up to 3mm Aluminium
- Up to 3mm Brass/non-ferrous

6kW Laser Source

- Up to 25mm Carbon steel
- Up to 18mm Stainless steel
- Up to 16mm Aluminium
- Up to 10mm Brass/non-ferrous

30kW Laser Source

- Up to 60mm Carbon steel
- Up to 40mm Stainless steel
- Up to 40mm Aluminium
- Up to 40mm Brass/non-ferrous

1.5kW Laser Source

- Up to 14mm Carbon steel
- Up to 7mm Stainless steel
- Up to 5mm Aluminium
- Up to 3mm Brass/non-ferrous

12kW Laser Source

- Up to 40mm Carbon steel
- Up to 40mm Stainless steel
- Up to 25mm Aluminium
- Up to 16mm Brass/non-ferrous

Note:

- For Aluminium/Brass/Copper (non-ferrous) cutting, in 1.5kW - IPG laser source is required
- For Aluminium/Brass/Copper (non-ferrous) cutting, in 3kW and above - All available brands are safe
- For tube cutting, please contact Koenig to confirm laser power requirements, as thickness capacities vary from those listed above.

Fiber Laser Options & Accessories

\$24,500+GST

20DHY

20Bar Pressure compressor for Air cutting. Providing a cheap manufacturing alternative to Nitrogen and Oxygen (for thin Mild Steel and Copper cutting) - Work safe certified.

\$9,500+GST

15 Bar Screw Compressor

Single-phase compressor that is best paired with the M2/M3 Fiber Laser. Can be used for cutting thin Mild Steel, Stainless Steel and Aluminium.

\$2,800+GST

Safety Light Curtain System

Recommended for all open bed machines and rear loading tables - stops the machine when someone enters the light curtain perimeter.

\$8,200+GST

PA200FSIQ

4 filter system including Hepa and Carbon, for combined metal/non-metal cutting (For KM1309FC/KM1313FC, KM1325FC).

\$9,500+GST

TODC4L

For LF1309, LF1313, LF1325L, LF3015LN/CN, LF3015P-Pro, (up to 3Kw) 4pcs filter cartridge, air flow is 4000m³/h, 380V/50HZ, 5.5kW, 0.6MPa

\$11,500+GST

TODC6L

TODC6L - For LF3015P-Pro, LF3015GA-Pro, LF3015GA (up to 6kW), LF3015GAR (up to 3kW)
For LF6025GT/GH (up to 3Kw)
6pcs filter cartridge, air flow is 6000m³/h, 380V/50HZ, 7.5kW, 0.6MPa

\$14,500+GST

TODC8L

TODC8L - LF3015GA-Pro, LF3015GA, LF3015GAR (up to 12kW)
For LF3015GAR, LF6025GT/GH (6Kw and above)
8pcs filter cartridge, air flow is 8000m3/h, 380V/50HZ, 11kW,
0.6MPa

\$2,950+GST

Gas Attachment Pack

N2 and O2 Regulators plus 2* hoses and all fittings to connect you gas packs to the machine (2*5m included as standard - longer hoses available on request)

\$1,850+GST

M-Series Rotary

Versatile Servo-powered rotary unit suitable for M2 and M3.
Suitable for tube diameter 15-150mm and up to 1200mm length. Max weight of tube: 35kg.

\$2,450+GST

M Series Gas Attachment Pack

O2 (Type 10 fitting) and N2 regulator (Type 50 or 51 fitting) with adapters to suit 8mm gas hose on M2 and M3 machine.

\$2,450+GST

CypNest

Software upgrade for advances nesting, individual part rotation control etc. (Not required for LF6025GH machine).

\$4,900+GST

Tubest

Software upgrade for complex tube cutting. Allows for full profile/detailed design within the program. Required for open profile cutting (C-channel, I-beam etc).

⚡ Koenig Machinery - Over 10 Years!

Your Trusted Local Machine Solution Expert

Australian-Based Sales, Service & Support You Can Rely On

For over 10 years, Koenig Machinery has been delivering best-in-class CNC laser solutions to businesses across Australia. With locally based technicians in Sydney, Melbourne and Brisbane, we provide nationwide coverage, ensuring our customers receive fast, reliable, and expert technical support whenever needed. Our Australian-based customer service and technical support teams operate from our Melbourne head office, delivering responsive assistance tailored to local business needs.

Investment In Innovation & Customer Experience

At Koenig Machinery, we are committed to continuous investment in technology, facilities, and customer service. Australia's largest range of demonstration machines in our Brisbane, Sydney and Melbourne showrooms, where we feature the latest in CNC laser machinery, providing live demonstrations and a dedicated space for technology development. We believe in empowering our customers with firsthand experience of the precision, efficiency, and reliability that our machines offer.

Strong Industry Partnerships & Long-Term Commitment

As a trusted supplier with industry-leading manufacturer relationships, we provide Australian businesses with high-quality CNC laser equipment designed for performance and durability. Our commitment to long-term customer relationships is reflected in our ongoing investment in technical staff, service and support teams, as well as enhanced marketing and management infrastructure. These strategic investments enable us to meet the growing demands of our expanding customer base across the Australian continent.

Why Choose Koenig Machinery?

- Locally based Australian technicians covering the entire country.
- Australian-based technical support and customer service from our Melbourne head office.
- Over 10 years of trusted service to Australian businesses.
- Ongoing investment in a state-of-the-art Melbourne showroom with the latest CNC laser technology.
- Commitment to long-term partnerships with expanded service, support, and management capabilities.
- Experience the Koenig Machinery difference – your partner in precision and performance.

⚡ Services

Machine Servicing

We offer scheduled maintenance and onsite service calls at reasonable rates. Our technicians work with you to maximize uptime and keep your business running economically.

Technical Support

Enjoy free lifetime phone and email support by Australians in Melbourne, Sydney and Brisbane. We provide onsite assistance and technical support to help you identify the right solution.

Operator Training

Our comprehensive on-site training ensures your team is confident in software, machine procedures, and maintenance. We empower you to run your equipment solo and successfully.

Machine Installations

Highly trained technicians handle your professional installation, assembly, and leveling. We calibrate the machine system and settings specifically to your needs to ensure optimal performance

Machine Consumable Warehouse

As a major Australian supplier, we stock over 100 varieties of acrylic sheets, laser plywood, nozzles, and lenses. One-stop sourcing ensures your production never stops.

Machine Spare Parts Warehouse

Our local warehouses stock essential components like air compressors and water chillers. We ensure product compatibility and fast shipping Australia-wide to reduce your setup hassles.

⚡ Testimonials

Matthew Dawson

“Partnering with Koenig Machinery allowed us to internalise production, ensuring total quality control. Their 3kW GA Pro delivered immediate ROI, faster turnarounds, and complete engineering independence.”

RMS Manufacturing, Victoria AUS

“Koenig has been excellent. Their support is levels above the competition, and the 75% reduction in production time has transformed our business. We have no regrets.”

SPS Drains, New South Wales AUS

“Since installing our Koenig fiber laser, we’ve slashed lead times from weeks to days. Their local support and high-precision machinery have revolutionized our production efficiency.”

Elanora Signs, New South Wales AUS

“Koenig is a stable partner. Their support is a phone call away, and the efficiency is undeniable—our finishing time dropped from twenty hours to twenty minutes.”

Maker Supplies, South Australia AUS
